Goals	Have a working and visually pleasing app; good team work; good grades; continuous work throughout the semester
Meeting norms	Be punctual; active contribution; respectful environment
Working norms	Do the work you're assigned to do, in the agreed time frame; in case of questions/struggles ask for help; set realistic goals; work
Coordination norms	If you cannot attend a meeting, please inform the team asap and give information on work in text-form
Communication norms	Open/honest/constructive communication; decisions should be made in consensus; if questions arise, take time to answer themm
Consideration norms	In case of issues: have open communication about it, resolve issues in a respectful way; for assistance contact Scrum Master
Cont. improvement norms	Learn from mistakes; give positive/negative feedback to team mates; exchange knowledge
Rewards	Give compliments for a job well done; have a virtual beer together
Sanctions	If at least 5mins too late to a meeting: sing a christmas carol

Product Vision	Project Mission
The importance of infotainment systems in cars is increasing and users expect more and more connectivity in the car (Handelsblatt, 2005). At the same time, different car manufacturers use different infotainment systems, each customized to the specific needs of the respective manufacturers. With InfotAiMOS, our goal is to create an OpenSource Android Automotive test app, which can be used by various software developers of infotainment systems to help them with the development of other apps and thus, make their work easier.	The mission of this project is to develop a functioning Android Automotive test app, that can help to test and simulate different use cases of infotainment systems immediately or with a time delay. It particularly focuses on the simulation of these use cases in the context of navigation, steering wheel knobs, media play, power management and vehicle properties. This app should therefore, provide the developers with a test system in which apps can be tested in a safe environment.

Term	Definition

Sprint	Theme Goal	Feature Name	Est. Size	Est.	Real Size	Real Remaining
Release						
	Total		115	0	104	0
Sprints						
			Estimated burn-down		Real burn-down	
1	Initial organizational tasks		0	115	0	104
2	Familarization with project		0	115	0	104
3	Implementation of Navigation Context Area		22	93	20	84
4	Development of Navigation & Steering Wheel		38	55	31	53
5	Development of additional Areas		33	22	31	22
6	Implementation of Vehicle Properties Use Cases		22	0	22	0

Features

1   Initial organizational tasks

Set up development environment and team structures

#30 Set up development

#31 Set up SD kickoff-meeting

2   Familarization with project

Familiarize with programming environmer

#9 Familiarize with Android Automotive

#10 Familiarize with test driven development

#11 Familiarize with Android development

#12 Familiarize with Kotlin

#27 Fill Bill of Materials

#28 Come up with Software Architecture

#29 Create an App

3   Implementation of Navigation Context Area

Create area for navigation use cases			
	#15 Design GUI for starting page	3	3
	#18 Implement GUI for use cases in navigation context area	3	3
	#5 Design GUI for use cases in navigation context area	3	3
	#16 Implement functionality to enter navigation use case area	3	2
	#8 Simulate starting a navigation	5	5
	#14 Simulate ending a navigation	3	2
	#17 Implement back button to previous page	2	2
4	**Development of Navigation and Steering Wheel Area**		
Further development of navigation area and implementation of steering wheel area			
	#61 Add an icon for the application	2	2
	#42 Design GUI for media play area	2	3
	#41 Implement functionality of clicking on activeNavigation Button	3	2
	#39 Design GUI for showing name and descriptions of steering wheel buttons	3	2
	#38 Implement click dummy to implement button functionality	2	2
	#37 Design GUI for steering wheel	5	5

#35 Implement functionality of pressing a steering wheel button: voicecontrol	5	2
#34 Implement functionality of pressing a steering wheel button: play/pause	5	2
#33 Implement functionality of pressing a steering wheel button: skipForward	3	2
#20 Implement functionality to enter steering wheel use case area	2	2
#19 Design GUI for steering wheel area on starting page	3	2
#13 Show that navigation is currently active	3	5
5 Development of additional areas		
Further development of steering wheel, vehicle properties and power management area		
#55 Implement tests for the starting page	3	2
#57 Implement tests for the navigation area	3	3
#21 Implement GUI for steering wheel in Android Studio	5	5
#40 Implement functionality to show name and description when clicking on a button	3	3
#66 Implement toggle button to switch between functionality and description wheel	3	3

	#25 Design GUI for vehicle properties area on starting page	5	5
	#7 Implement GUI for use cases in the vehicle properties context area	2	2
	#26 Implement functionality to enter vehicle properties use case area	2	2
	#22 Design GUI for power management area on starting page	2	2
	#24 Implement GUI for use cases in the power management context area	3	2
	#23 Implement functionality to enter power management use case area	2	2
6	**Implementation of Vehicle Properties Use Cases & Refactoring**		
	Develop an Area to test Vehicle Properties		
	#58 Create the Build Process Video	5	5
	#72 Implement functionality of pressing a steering wheel button: SeekForward	3	2
	#51 Implement functionality to switch between day and night mode	5	5
	#43 Implement functionality to enter media play use case area	2	2
	#92 Design mute button in power management area	2	1

#93 Design delay button in power management area	2	2
#56 Implement tests for the steering wheel knob area	3	5

Burn-down Chart

|		
#21 Implement GUI for steering wheel in Android Studio	5	5
#40 Implement functionality to show name and description when clicking on a button	3	3
#66 Implement toggle button to switch between functionality and description wheel	3	3
#25 Design GUI for vehicle properties area on starting page	5	5
#7 Implement GUI for use cases in the vehicle properties context area	2	2
#26 Implement functionality to enter vehicle properties use case area	2	2
#22 Design GUI for power management area on starting page	2	2
#24 Implement GUI for use cases in the power management context area	3	2
#23 Implement functionality to enter power management use case area	2	2
6 Implementation of Vehicle Properties Use Cases & Refactoring		
Develop an Area to test Vehicle Properties		
#58 Create the Build Process Video	5	5

	#72 Implement functionality of pressing a steering wheel button: SeekForward	3	2
	#51 Implement functionality to switch between day and night mode	5	5
	#43 Implement functionality to enter media play use case area	2	2
	#92 Design mute button in power management area	2	1
	#93 Design delay button in power management area	2	2
	#56 Implement tests for the steering wheel knob area	3	5
7	**Implementation of Timer Context & Speech Assistant Area**		
	Develop an Area for the timer context and the Speech Assistant		
	#100 Simulate speech announcement in navigation context area	5	tbd.
	#113 Design GUI for App Settings area on starting page	2	tbd.
	#114 Implement functionality to enter App Settings context are	1	tbd.
	#123 Implement GUI for use cases in App Settings Context area	2	tbd.
	#115 Move functionality for switch between day/night mode to App Settings context	2	tbd.
	#101 Design GUI for timer area on starting page	2	tbd.

	#102 Implement functionality to enter timer use case area	1	tbd.
	#117 Implement GUI for list in timer area	5	tbd.
	#105 Design GUI for speech assistant area on starting page	2	tbd.
	#106 Implement functionality to enter speech assistant use case area	1	tbd.
	#124 Implement GUI for use cases in Speech Assistant context area	1	tbd.
	#104 Implement functionality for timer in timer context area	5	tbd.
	#103 Design Delay button in speech assistant area	2	tbd.
8	**Implementation of Speech Assistant and Vehicle Properties Use Cases**		
	Develop use cases in speech assistant and vehicle properties area		
	#54 Implement functionality to set the system in stand-by mode	tbd.	tbd.
	#107 Implement functionality of PTT speech assistant	tbd.	tbd.
	#108 Implement functionality of TTT speech assistant	tbd.	tbd.
	#109 Implement functionality to switch between left-hand drive and right-hand drive	tbd.	tbd.
	#111 Implement functionality to switch between day and night mode in the whole system	tbd.	tbd.

	#116 Refactor GUI of starting page	tbd.	tbd.
	#110 Design tile to show vehicle identifier number in vehicle properties area	tbd.	tbd.
	#112 Design tile to show battery level in vehicle properties area	tbd.	tbd.
9	**tbd.**		
tbd.	TBD: issues in this sprint, since we only get requirements from the industry partner week by week	tbd.	tbd.
	tbd.	tbd.	tbd.
	tbd.	tbd.	tbd.
	tbd.	tbd.	tbd.
	tbd.	tbd.	tbd.
	tbd.	tbd.	tbd.
10	**Christmas Break**		
	n/a		
11	**tbd.**		
tbd.	TBD: issues in this sprint, since we only get requirements from the industry partner week by week	tbd.	tbd.
	tbd.	tbd.	tbd.
	tbd.	tbd.	tbd.

#	Feature Definition of Done	Sprint Release Definition of Done	Project Release Definition of Done
	- Code compiles and builds	- DoD of each feature in the sprint release is met	- Everything from the Sprint release is fullfilled
	- Acceptance criteria are met	- No known severe bugs open	- All implemented features must be fully working
	- Tests have been written and were passed	- All feature tests were passed	- Documentation is available
	- Code is peer-reviewed	- Feature is merged into the main branch	- APK is available
	- Feature is merged into development branch	- Implemented Issues are closed	
	- Documentation is updated	- Feature board is updated	
	- Bill of Materials is updated	- Sprint Release Candidate is properly tagged
